

Facilities Maintenance Supervisor BC Biomedical, Surrey, BC

Scope of the Position

The Facilities Maintenance Supervisor is responsible for maintenance of 150,000 square foot of combined owned and leased property, including a state of the art laboratory. You will supervise a staff of four and outside tradespersons to ensure that HVAC, electrical, plumbing, mechanical and distribution systems are in top working order. We'll rely on you for effective preventive maintenance, proper installation and change practices. Duties include keeping accurate records, preparing maintenance budgets and supervising trade people to ensure quality and safety. You will also assist the Facilities Coordinator in the successful completion of major and minor renovations, alterations and clinical installations.

Qualifications

You must have 5-7 years of light commercial building operations experience, and a Power Engineer Level 4 certificate. SMA and SMT designations are assets. In addition, you should have experience with building automated systems and developing optimal tracking. We require excellent communication skills, strong leadership and supervisory experience to effectively organize the efforts of the Facilities Team, and the ability to learn our proprietary software programs.

About Our Company

BC Biomedical is recognized for providing the highest quality laboratory diagnostic services and has the largest group of pathologists practicing together in North America. We are proud to have been consistently named one of "Canada's 50 Best Employers." With more than 40 community-based patient service centres located throughout the Lower Mainland, our 700+ employees provide provide lab testing as well as expertise for clinical trials, scientific research, drug screening, pre-employment screening and occupational health testing. Our work serves more than 1.8 million patients every year.

What We Offer

In addition to joining a dynamic and progressive team dedicated to achieving the highest standards, you will receive a competitive salary and comprehensive benefits.
