Charging on: BC Hydro data shows public EV charging nearing pre-pandemic levels

Source: BC Hydro

New BC Hydro data shows use of its public EV charging stations has rebounded since COVID-19 restrictions were eased, nearing almost pre-pandemic levels, despite the ongoing health crisis. COVID-19 stay-at-home measures were implemented in mid-March and by April, charging sessions dropped by nearly 30 per cent. Since then, charging sessions have been steadily increasing with B.C.'s economic restart, and have increased by almost 50 per cent since their lowest point.

Carbon neutral achievement sets stage for bold climate action

Source: Metro Vancouver

Metro Vancouver's leadership and commitment to climate change have allowed the regional district to achieve corporate carbon neutrality for 2019 and potentially through 2022. This puts the region in a strong position to advance important climate actions as part of Climate 2050 and achieve its ambitious climate change and environmental goals.

ENERGY-EFFICIENT BUILDINGS

How wood buildings benefit workers, employers and building owners

Source: Canadian Architect

“Mass timber is the next big step in green buildings,” writes Graham Lowe, Ph.D. “The benefits of mass timber include its ease of construction, light carbon footprint, positive effects on human health and well-being, and better organizational performance.”

Pairing sustainability and sanitation in post-pandemic office buildings

Source: Forbes

Results from a recent Citrix poll suggest that more than 75 per cent of workers will continue working from home until stronger health measures are put in place, such as regular and documented deep cleanings, physical distancing floor markings and appropriately spaced work areas.

Roofing - Savings up to 50% or more!

ASTEC develops and manufactures fluid-applied membrane systems for the sustainable restoration of roofs, walls, and other industrial surfaces. Installation Savings up to 50% or More compared to a complete tear-off / new roof. ASTEC Re-Ply fluid-applied roof systems can be installed directly over most traditional roof substrates. Tear-off, land-fill fees, reconstruction, and long facility disruptions are eliminated. All ASTEC systems qualify for Energy Star and Cool Roof programs.

TECHNOLOGY

Smart pumps are key for more sustainable cities

Source: SmartCitiesDive

Peter Gaydon, director of technical affairs at the Hydraulic Institute, writes that it is important for decision-makers in commercial building, utilities and power generation to consider the pumps that are often overlooked when we talk about sustainable cities, as these can account for nearly half of industrial energy use.
