

April 26, 2010

Hon. Gordon Campbell
Premier of British Columbia
PO Box 9041 STN PROV GOVT
Victoria, BC, V8W 9E1

Dear Premier Campbell:

The Building Owners and Managers Association wishes to congratulate you and the B.C. Government for taking another major step toward the realization of the Site C Clean Energy Project. Clean, renewable and affordable energy is a priority for both the province and B.C.'s commercial real estate industry.

BOMA BC is at the forefront of engagement with our members to transform the commercial building industry. We are actively working to reduce energy consumption and carbon emissions and help the Province meet its 2020 Energy Plan targets through BOMA BEST™, our green certification program for commercial buildings. We have signed a Memorandum of Understanding with the Province and BC Hydro that sets energy and carbon targets for commercial buildings. BOMA BC is also registered with Pacific Carbon Trust as an aggregator of carbon credits.

Apart from energy conservation and lower carbon emissions, access to reliable and self-sufficient sources of energy is another pressing concern for our industry. As B.C.'s energy needs grow, Site C will meet that demand with a source of clean and renewable electricity for over 100 years. The hydroelectric generating station will lessen our reliance on fossil fuels while creating new opportunities for economic development and job creation for B.C. communities.

BOMA BC and the commercial real estate industry recognize and congratulate you for taking a leadership role toward a shared future powered by green energy.

Yours truly,

Michael Bishop
President
