

BOMA BC Membership Report re: Green Incentives

January 2012

Green Incentives – a strategic objective for BOMA in 2011 was to present opportunities for the provincial government to provide financial incentives to BOMA BEST certified buildings. BOMA has met with key cabinet ministers to encourage government support for green tax credits which, although well received, was challenging during a period of deficit budgeting. Towards the end of 2010, BOMA had follow up meetings with various Energy, Environment & Climate Action Ministers to discuss our concept for a '*WorkGreen BC*' proposal to fund an exciting and dynamic opportunity to help small to medium sized buildings become energy efficient and environmentally responsible. BOMA goals in this area are consistent with government long term plans and tie directly into targets established through and MOU with the Province and BC Hydro. For a copy of BOMA's WorkGreen BC Proposal see the 2011 section [here](#).
